F2Si WINS CONTRACT FOR 3 DIAMOND DA40 AATDS

Pittsburgh, PA. March 12, 2019 – Fidelity Flight Simulation Incorporated (F2Si) is proud to announce the award of a contract from Utah based Granite School District to build three (3) DA40 Diamond Star flight training systems scheduled to be delivered July 2019. Granite School District's Aviation Department intends to prepare students with the knowledge and skills to safely perform all DA40 normal/abnormal/emergency procedures upon completion of their aviation program.

F2Si is confident Granite School District's students will gain experience using F2Si's Modular Aviation Training Equipment (MATE) that will enhance the students' transfer of training to the aircraft without having to reacquaint themselves with the actual cockpit configuration as the students continue with their aviation training.

About the Modular Aviation Training Equipment (MATE)
Expand your training program with our exclusive MATE design

- Single seat, open frame, sled-style training unit for fixed wing and rotorcraft
- Reconfigurable models, train multiple aircraft types on one unit!
- BATD or AATD FAA certifications
- Unique control types are available: Cirrus, Diamond, …
- Glass cockpits and standard six-pack avionics
- Interchangeable main instrument panel (MIP) and switch panels:

About F2Si: F2Si provides more than just flight simulation training devices! We offer simulator solutions for Land, Sea, & Sky. At F2Si, our mission is to manufacture affordable, highly dynamic simulation devices across the training industry with exceptional product quality coupled with our superior customer service.

F2Si is a woman managed, veteran-owned small business (VOSB), based in Pittsburgh, PA. Founded in 2000, F2Si has designed, manufactured, and delivered over 60 simulation training devices for commercial, military, and educational customers globally. More information is available on our website at www.F2Si.net or by calling 412-321-3280.
